

1. Build Dog's website from scratch

- Use basic HTML tags to define the overall structure of a web page.
- Add some text content to the web page.
- Add an image to the web page.
- Separate the web page into sections and give each section a heading.
(https://www.w3schools.com/html/html_div.asp)
- Apply some basic style to the sections using CSS rules.

Modify the page's content to make it your own website.

- Replace the name in the page's title with your own.
- Replace the interests listed with your own.
- Replace the picture of Dog with a picture of yourself.

Modify the page to include a table of courses you are taking and have taken. Your table should have:

- three columns: course code, course title, and Faculty chosen
- two vertical sections, with headers for courses taken 'Credit value' and as 'No of students'
- alternating row background colors, so it's easy to read
- green colored text if the class is currently being taken

2. Create a page named aboutme.html that describes you On your page, include some or all of the following information:

- Your name
- A description of yourself in two sentences or less. Emphasize the most important word(s) by putting them in bold.
- A list of classes you are taking right now at III year.
- Your 3 favorite movies, books, or TV shows, in order. Make at least one link to an interesting site about that tv show/movie/book, such as its IMDB page.
- Two images, one that represents you when you're happy and the other to represent you when you're sad.
(These can be any images you like. Consider searching for images on Google Image Search)
- Something interesting about one or more of your neighbors (people sitting at computers next to you)

Create a stylesheet named aboutme-style.css to improve the appearance of your About Me page. Your stylesheet should do the following without any modification to your HTML code:

- Change the color of at least two elements
- Change the font properties of at least two elements (such as family, size, weight, style). Here are some standard fonts you may want to use:

Arial, Arial Black, Verdana, Trebuchet MS, Georgia, Tahoma, Courier New, Times New Roman

- Change at least one other thing of your choosing (such as background color, text alignment, etc.)
